<ul style="list-style-type: none"><li>● <b>Major:</b> Bachelors of Science in Digital Information Design, concentration in Web Application Development</li><li>● <b>GPA:</b> 3.4</li><li>● <b>Undergraduate Coursework:</b> Web Programming, Database Processing, UI/UX Design, Web Design and Development</li></ul>		

---

## PROJECT EXPERIENCE

### Southern Charm Events Calendar

- Collaborated with a five-person team to spearhead the creation of an event management web application.
- Implemented a calendar and notification system to remind the owner of tasks that are due for events.
- Participate and contribute to code reviews of peers.
- Created a secure login system using Firebase.
- Utilized: PHP, SQLite, JavaScript, AJAX, AWS, Firebase, HTML, CSS, Figma

### Sassy Signs Website

- Managed the back-end web development for the Sassy Signs website.
- Programmed and designed an admin UI for the business owner to update inventory and gallery images from their website.
- Liaised with team members to gather, document, and address project requirements.
- Gain experience working and collaborating within an Agile development environment.
- Utilized: React, Express/Node.JS, MySQL, Firebase, Figma

### Task Timer

- Designed and developed a mobile web application that allows the user to easily log and track tasks.
- Programmed backend that allows the user to create, edit, update, and delete tasks and their information in a database.
- Created a fully interactive prototype of the application in Figma.
- Utilized: PHP, MySQL, JavaScript, JQuery, HTML, CSS, Figma

### Weather Application

- Designed and programmed a weather application with a pixel aesthetic.
- Used OpenWeatherMap's public API to fetch and display data for the application.
- Utilized: React, JavaScript, CSS, APIs
